

# Fat, Oil and Grease (FOG) Program and Industrial Pretreatment Basics

\*\*\*\*\*

**This class is full; no new registrations can be accepted.**

Date	Location	
Sept 25 Tuesday	<b>Rochester</b> Community Center, 150 Wakefield Street, Suite 3 Rochester, NH 03867	<b>Full</b>
Oct 4 Thursday	<b>Merrimack</b> Anheuser-Busch 221 Daniel Webster Hwy, Merrimack, NH 03054	<b>Full</b>
Oct 12 Friday	<b>Franklin</b> Wastewater Training Facility 528 River Street Franklin, NH 03235	<b>Full</b>

Larger municipalities have been dealing with pretreatment issues for years, but what if an industry locates in smaller community? This workshop will provide you with a basic understanding of pretreatment regulations and the EPA pretreatment program. With this information your facility will be ready to answer basic questions about pretreatment for disposal to a septic system or to the WWTF. **Taught by:** *George Carlson NH DES staff* (1-2 hours). The Merrimack location will include a tour of the Anheuser-Busch industrial pretreatment unit, please see note on page 2.

Every community has establishments that serve food, but are you prepared to deal with issues created by grease? The FOG program basics portion of this workshop will teach the basics of having a FOG program, including what regulations apply, how to deal with residential FOG, conducting inspections at food service establishments and the “wacky” things you may see in the field. Participants will be taught how to develop a FOG management program.

**Taught by:** *Ray Gordon NHDES staff* program (3-4 hours).

All classes will be held from **9:00 am – 2:30 pm** on these days. A pizza lunch will be included with the **\$35 registration fee**. Wastewater operators will get 0.5 CEU’s and Septic Designers and Installers will get 3 Subsurface Bureau Continuing Education credits.

\*\*\*\*\*
